

inosil[®]

dispersion of nano particles as basic materials for our customers

different dispersion media

- water
- solvents

various chemical compositions

- silica based
- adjustable pH
- if necessary Al₂O₃, ZrO₂, TiO₂-modified

wet chemical application

- adjustable curing behaviour
- spray coating, screen printing etc.
adjustable viscosity
- excellent wetting and adhesion on
various substrates

customers product samples

- Vatramil[®] flame retardant systems by
MV Engineering GmbH & Co. KG
- decorations "V-Color" by
Viking Advanced Materials
- catalytic coatings "Nanocat" by
ItN Nanovation AG
